

Ferrari California Gets DMC Carbon Fiber Aerodynamic Parts [Photo Gallery]

04/11/2011 20:27 by admin

The California might be the smallest Ferrari, but this doesn't mean that the car doesn't receive tuning attention. Oh no. The latest example that demonstrates this come from DMC Exotic Car Tuner, which has developed carbon fiber accessories for the Cali.

The German aftermarket developer is offering a new front fascia lip, which comes with a simple design, but manages to offer a different visual feeling. At the rear, we have diffuser, with comes with generous dimensions.

The carbon fiber m... [...]
