

Lamborghini LP700-4 Aventador by Giovanna Wheels

08/11/2011 20:39 by admin

No matter how many or few accessories the Lamborghini Aventador LP700-4 has, it's bound to steal some attention at shows like SEMA. One in particular, that was displayed at the Giovanni booth, was quite a hit with the audience, even if the modifications done on it were limited to a new set of Giovanna's GFG forged modular wheels. Everything else about the new Lamborghini supercar remained the same, which really isn't a problem, especially when you consider that the supercar comes with a throaty 6.5-liter V12 engine pushing out 700 horsepower at 8,250 rpm and 509 lb/ft of torque at 5,500 rpm.[...]
