

## Nissan Juke-R Interior Ergonomics Revealed [Video]

09/11/2011 16:50 by admin

Nissan has already unveiled the Godzilla-powered Juke-R during a media event held last month in Spain, but the company insists on teasing us through more and more videos. This time, the Japanese carmaker is giving us the sixth episode of this story.

Having GT-R internal organs is great, but this beast also needs a master, so engineers and designers had to work together in order to make the cabin suitable for a human being.

The team installed an FIA-approved bucket seat that will hug the dr... [...]
