

Lexus LX 570 by JT Grey Racing

09/11/2011 20:51 by admin

The 2011 SEMA Show gave JT Grey Racing the opportunity to take on Lexus's mighty LX 570. Their package is as rough and tough as any other, ready to take on the sand-filled crusade of the Baja 1000. The LX570 by JT Grey Racing was hooked up with a HeadFirst Design graphic design, Blue Media/3M vehicle wrap, and 6 KC Hilites- 70w carbon fiber HID off road lighting. Large 17" F-Sport forged Off-Road wheels wrapped in BFGoodrich Baja TA 37"x 12.50 race tires will help it survive in any gnarly desert conditions. The interior of the LX570 was also upgraded with Sparco USA- EVO seats, a Sparco USA steering wheel, Lowrance HD7 / LMF 400 GPS navigation, and Kenwood 110 with PCI radio/intercom. The Baja Series is no joke, so JT Grey Racing also upped the performance ante with new OE/TRD pads brakes, a King Racing Shocks suspension system, and a Flowmaster/Geiser exhaust system.[...]
