

Alfa Romeo RF-Brera by Romeo Ferraris

02/12/2011 16:52 by admin

Italian tuning firm, Romeo Ferraris, has a new tuning program in their catalog, one that features a significant performance modification for the soon-to-be defunct Alfa Romeo Brera. The package is called the RF-Brera, and as the name suggests, it's got Romeo Ferraris's imprint all over it. Already powered by an impressive 3.2-liter V6 engine that produces 260 horsepower and 237 lb/ft of torque, Romeo Ferraris decided that it just wasn't good enough. So they went out and built a program for the car, adding a host of enhancements that include a Rotrex centrifugal compressor, a new intercooler, a sport air filter, a remapped ECU, and a brand new complete exhaust collector and metal catalyst. On top of that, the Italian tuning company also installed kit sports springs and dampers adjustable in height and calibration to give the car better handling and split-second response, especially in tight corners.[...]
