

Range Rover Evoque HFI-R by Marangoni

03/12/2011 01:58 by admin

Italian tire manufacturer, Marangoni, has been down the tuning road before, having performed some previous projects on vehicles like the Alfa Romeo Giulietta. Today, Marangoni is back with another program, this time for the Range Rover Evoque. As comprehensive projects go, this one's definitely right up there and the unmistakable work done on the Evoque speaks volumes about the talent of these guys. For the exterior's styling, Marangoni collaborated with TRC Italia in dressing up the Evoque with a special fine grain Titanium Fluid Metal paint finish. The front grill, hood vents, and door handles were then painted in gloss black to provide a contrasting look to the body of the Evoque. Other panels that were modified include the front bumper fascia, door lower moldings, and rear bumper fascia, which were also given a carbon diffuser. Speaking of carbon, Marangoni also gave the Evoque plenty of that, particularly to the wheel arches, fender vents, and mirror covers. Rounding out the exterior changes on the crossover are a set of 20" Oz Racing Dakar wheels wrapped in Marangoni's exclusive ruby red M-Power EvoRed tires. For the interior dress-up, Marangoni enlisted the help of Italian fashion house, Conte of Florence, who came out with the genius idea of dressing up the interior with a special golf inspired quilted upholstery with a large embroidered Tour Line emblem on the seats.[...]
