

BMW X6 by Senner Tuning

06/12/2011 03:25 by admin

Most of the packages from Senner Tuning have focused on vehicles such as the Nissan 370Z and the Audi A5, but now the tuner has diverted their attention to a larger car: the BMW X6. Their tuning package has it all, with exterior and interior upgrades, as well as a 30 HP power increase. The exterior modifications err toward the side of the M6, with a new front bumper, large air intakes in a honeycomb design, a new tailgate, and a modified exhaust system. The standard wheels were whisked away and replaced with a new set of 22" wheels, leading towards the bottom part of the X6 where the tuner added a Bilstein B8 shocks system and springs with 25/20 mm lowering feature. The interior was only perked up with a new pedal set and a new DVD system to entertain any and all guests of the crossover.[...]
