

MINI John Cooper Works Championship

08/12/2011 19:31 by admin

If there was ever a Mini Cooper that was on everyone's wish list, it would be the John Cooper Works, but just because everyone wants it, doesn't mean everyone can get it. Until now. Mini has come out with a solution to turn your standard Cooper S, Cooper SD, and Countryman into a true JCW without taking a trip to the tuning shop. The new John Cooper Works Championship tuning package will allow any Mini fan to experience the allure of rallying by adding a more dynamic and sporty character to their car. It was created as a tribute to the John Cooper Works WRC that Dani Sordo currently drives in the WRC. It includes go-faster stripes, side scuttles in a special package design, additional spotlights up front (which are available in Chrome and Black), a "37" logo on the doors, and the famous John Cooper Works aerodynamics package in the color of the car. You can also opt for a new set of Double Spoke R129 alloy wheels in matte black.[...]
