

Jaguar XJ by Startech

14/12/2011 21:04 by admin

Startech has come out with a new program for the 2011 Jaguar XJ, complete with a new aerodynamic kit and a retooled interior that pushes the luxury refinements on the Big Cat saloon to a new level. The German tuner is considered one of the best aftermarket companies in the market and it tripped out on the Jag with an aero kit that includes Startech front attachments mounted to the production bumper. The attachments also come with air inlets that add a touch of sportiness and aggressiveness to the XJ. Integrated into the side air inlets are LED daytime running lights that add an element of class and sophistication to the car. The front fenders on the car were also treated with integrated air outlets and side sills that have been attached to the wheel arches. As for the rear, Startech applied a new fascia that has its own integrated diffuser whereas two integrated 'design' panels provide the trademark Startech looks and a subtle rear spoiler lip on the trunk lid creates aerodynamic balance on the XJ. The luxury car also sits on a new set of 21" Startech Monostar J Diamond Edition wheels that were designed using state-of-the-art forging technology.[...]
