Certain tuners seem to have an ambition for turning vehicles that were made as workhorses into cool rides and we are here to give you the latest example of such a development. This comes from MC Car Design, which has released a tuning package for the long wheelbase version of the VW Caddy passenger van.

The most important part of the kit is an air suspension for both axles, which allows the driver to play with the ride height as he pleases. Of course, the system also comes with an automatic l... [...]
