

BMW 5-Series V-MS by Vorsteiner

03/01/2012 15:48 by admin

Noted BMW tuning company Vorsteiner has been burning the midnight oil the past couple of weeks, having released one program after another for a number of models from the German automaker. It appears that they've stretched their run of programs for Beamers into the next calendar year with the release of the new V-MS program for the BMW 5-Series F10. The whole set of modifications encompass a comprehensive list of new aerodynamic body panels, all of which are made entirely out of carbon fiber. As if we expect anything less from Vorsteiner. The carbon fiber V-MS components have been designed to fit cars equipped with the M-Sport package and includes a new front spoiler, a boot lid lip, a new diffuser section on the rear bumper, a bolt-on replacement cat-back performance exhaust system that's available in either stainless steel or titanium, with the aforementioned exhaust slashing off about 25% of the weight from the standard equipment fitted by BMW into the 5-Series F10. The whole set of modifications don't come with any engine enhancements, which means that you'll still see the 5er's eight-cylinder engine boasting of an output that could reach up to 407 horsepower.[...]
