

Akrapovic to Release Titanium Exhaust for Porsche Cayenne

20/01/2012 15:51 by admin

The Porsche Cayenne has been selected as the next target of Slovenian exhaust company Akrapovic, which is working on a titanium exhaust system for the German SUV. The aftermarket goodie will now only increase engine output, but, thanks to the fact that it will be made of titanium, will also reduce weight compared to the factory one.

Akrapovic aims to offer all customers a chance to upgrade their Cayennes, so it will offer a slip-on exhaust for the Cayenne Diesel, a slip-on exhaust system for ... [...]
