

Nissan GT-R Gets Carbon Ceramic Alcon CCX Brakes

23/01/2012 17:50 by admin

Alcon, a company that supplies performance components for companies such as Audi, Bentley, JLR, Ariel, Noble and other has now launched an aftermarket carbon ceramic brake kit for supercars, with the first application being the Nissan GT-R.

The CCX (Carbon Ceramic Xtreme) disc material comes with half the mass of a similarly-sized iron rotor and was developed in-house by Alcon. The company offers multiple size that can fit multiple supercars.

The Nissan GT-R carbon ceramic kit includes:[...]
