

## Lamborghini Aventador Gets Renm Performance Tuning Kit

07/02/2012 14:43 by admin

The Lamborghini Aventador has recently received a new tuning package (just a preview for now) from Renm Performance, with the package targeting the tech, exterior and interior of the supercar.

The V12 engine gets a new air intake, a custom exhaust system that uses materials like inconel or titanium (customers can choose between a road and a race specification), as well as an ECU remap, with all these tech goodies increasing the power by up to 10 percent (the stock value sits at 700 hp).[...]
