

## Toyota GT 86 by TOMS

13/02/2012 01:44 by admin

Back at last month's Tokyo Auto Salon, Toyota unveiled a number of GT 86 variants that made our heads spin. Now, we're being treated to another program for the Japanese sports car, this time courtesy of Japanese tuning firm, TOMS. As part of the program for the fabulous 86, TOMS built and designed an aerodynamic program that consists of a new carbon fiber front spoiler, a new rear spoiler, a pretty intense quad exhaust system, a plethora of brake chambers, a mechanical processor for the aforementioned exhaust system, and a new set of aluminum wheels that improves on the Japanese sports car's already aggressive stance. According to TOMS, their aero program can also serve as a supplementary kit for any of the other 86 kits being prepared by TRD, Modellista, or GRMN. Sharing is caring, right? [...]
