

Porsche Cayenne CLR 558 GT by Lumma Design

16/02/2012 20:51 by admin

Every year, German tuner Lumma Design unveils a new iteration of their popular CLR 558 GT program for the Porsche Cayenne. Back in 2010, they came out with this gem of a project, before following it up with an equally impressive program in 2011. This year, Lumma is back with the 2012 CLR 558 GT program and just like its predecessors, it comes with an extensive set of aerodynamic and performance upgrades that would make Cayenne owners drop to their knees. On the aero front, Lumma built an aggressive bodykit made from PUR-RIM that includes a newly-styled front bumper with larger intakes, new grilles, wheel arch extensions, side skirts, a vented rear bumper with an integrated diffuser, a tailgate spoiler, and an imposing hood that was constructed from a carbon fiber and Kevlar composite. In addition, Lumma also added quad fog lamps, LED daytime running lights, and a new set of 22" wheels that are available in either Racing CLR 22 or Mono 22 styles, both of which come in either silver or matte black.[...]
