Less than 24 hours after bringing you the first pictures of the DS4R that were leaked onto the web on Thursday, Citroën released official images of the concept model that will be make its world premiere at the 82nd Geneva Motor Show in early March. As reported, the DS4 Racing Concept is powered by a tuned version of the 1.6-liter turbocharged engine found in many of the PSA Peugeot-Citroen group models and which was developed in conjunction with the BMW Group. In the DS4 R concept, it puts out a whopping 256 HP ? that's 160 HP per liter, which Citroen says is a record for a mass-production car. At the same time, despite its high output, CO2 emissions are just 155 g/km.[...]
