

BMW M5 ACS5 Sport by AC Schnitzer

02/03/2012 06:23 by admin

It seems that G-Power is not the only tuner who showed interest in the new BMW M5. AC Schnitzer also announced a new ACS5 Sport package based on the M5 for the Geneva Motor Show. And today the tuner unveiled the first images and details on the package. The ACS5 Sport will be powered by a twin-turbo 4.4-liter V8 engine tuned to deliver a total of 620 HP and a peak torque of 531 lbs-ft. That's a little less than the G-Power's 640 HP, but still is an increase of 60 HP and 30 lbs-ft. No other details have been offered, but for the interior it seems that the tuner will be offering blue-accented trim, an alloy iDrive cap and stainless steel pedals. The interior will most likely offer an extreme aerodynamic package but we will get back with more details on this next week when the car is set to make its world debut.[...]
