

Porsche Panamera Turbo by JE Design

02/03/2012 18:27 by admin

German tuner, JE Design, has taken the proverbial gloves off of their new tuning program for the benevolent Porsche Panamera. Comprised of an extensive aero package and noteworthy performance modifications, the fellas from JE Design really outdid themselves this time. The aero package consists of a number of new body elements for the Panamera, including a new front skirt that has been designed to allow the air in-flow of the intercooler to be further maximized. The program also has daytime driving lights, marker lights, and blinking LEDs that have been integrated into the elaborate double bars. The program also has a new custom-fitting skirt that has central vent openings, new side skirts that integrate harmoniously into the Panamera's design, an extendable rear spoiler, a complete rear skirt with a diffuser and central air outlet, an optional JE DESIGN stainless steel cat-back exhaust system that includes valve control, a new air-suspension, and a set of 22" Pandora light-alloy wheels.[...]
