

BMW ACS3 2.8 Turbo by AC Schnitzer

03/03/2012 03:28 by admin

AC Schnitzer is one of the first tuners to offer an upgrade package for the new generation BMW 3-Series. Their kit, named ACS3 2.8 Turbo, is set to make its world debut next week at the 2012 Geneva Motor Show, but until then the tuner has decided to offer us a few new details on the model. Based on the BMW 328i, the new ACS3 2.8 will take the brand-new 2.0 liter four-cylinder engine and tuned it to deliver a total of 295 HP and a peak torque of 302 lb-ft, up from the standard 245 HP and 258 lb-ft of torque. This boost in power is accompanied by a sports rear silencer with two chromed "Racing" tailpipes in a right/left combination. For the exterior, the tuner has added a front spoiler, chromed front grille, rear roof spoiler, rear spoiler, and rear skirt extension, complemented by designer stripes. The car will be offered with 18-, 19-, and 20-inch wheels combined with a suspension spring kit. For the interior, AC Schnitzer is offering a "Black Line" aluminum cover for the BMW "i-Drive" system controller, a "Black Line" aluminum handbrake handle, an aluminum pedal set, foot rests, and velour floor mats.[...]
