

Volkswagen Golf V R32 by MR Car Design

05/03/2012 23:51 by admin

MR Car Design, in collaboration with BTS-Racing, has released a new aftermarket tuning package for the Volkswagen Golf V R32, which was produced from 2005 to 2008. The package starts with a R32 HPG turbo kit and a 3-inch sport exhaust system with valve control. After performance tuning, the Golf's 3.2L engine makes a whopping 458 horsepower and 405 lb.-ft. of torque. That's an amazing increase of over 210 horsepower and over 165 lb.-ft. of torque. To handle all that extra power, the tuning companies reinforced the DSG transmission. The tuning doesn't stop there. With the package, The Golf V also receives a KW Clubsport suspension kit, H&R stabilizers, and a Stoptech brake package. All the old bushings are replaced with Superpro bushings. The matte blue VW MR Car Design used to highlight their performance parts got fitted with 19-inch OZ Ultraleggera HLT matte alloy wheels wrapped in 225/35/ZR19 high performance tires.[...]
