

Mercedes CLS63 AMG by Mansory

10/03/2012 00:52 by admin

You think a Lamborghini Aventador and a McLaren MP4-12C is enough work for a tuning company like Mansory? Guess again. The German tuning company introduced their third presentation at the Geneva Motor Show, this time involving a fully customized Mercedes CLS 63 AMG. Nothing speaks more to Mansory's capabilities than their expertise in turning a series-production CLS into a bonafide four-wheeled rocket. The complete modification consists of a comprehensive aerodynamic program made entirely out of carbon fiber. Drawing from their carbon fiber experts, Mansory was able to build by new front and rear wings, new side sill sets and cladding, a newly designed bonnet, a redesigned front apron with daytime driving lights, a new rear apron, a newly-installed diffuser, a rear spoiler, and a new set of 20" ultralight forged wheels. Inside, Mansory applied a luxurious touch-up to the CLS63 AMG that includes new aluminum pedals and footrests, an elaborately designed full-leather upholstery, polished entry sills, and floor mats with exclusive embroidery. Just like the body components, the interior also gets generous heapings of tailored carbon-fiber components for the dashboard and center console. Finally, the steering wheel gets newly designed ergonomics, further accentuating the improved interior aesthetic of the Mercedes coupe.[...]
