

Audi TT-RS ECU Remap by APR

13/03/2012 14:17 by admin

APR, an US tuner that likes to play with cars belonging to the VW Group, has recently released a new project, with the base car this time being an Audi TT-RS. The aftermarket developer has created an ECU remap for the vehicle, bragging that its program is the best power per dollar modification for the new 2.5 TFSI.

To be more precise, the five-cylinder engine, which delivers 340 hp and a peak torque of 332 lb-ft when it leaves the factory, has been gifted with APR's Stage 1 ECU mod, which all... [...]
