

Win a Factory Five Mk4 Kit through PowerBlock TV

13/03/2012 23:19 by admin

Factory Five is known for being the premiere Shelby Cobra replica builders of the world, but how does their Mk4 Roadster stack up against the original 427? On March 17th and 18th, 2012, Powerblock TV will be airing episodes of MuscleCar TV that will show both cars stacked up against each other in a variety of driving categories. The Mk4 Roadster was jacked up with Ford's new 5.0L Coyote engine, upgraded Wilwood brakes, Moser's wavetrack rear end, and KONI's latest double-adjustable shocks before both cars went to Charlotte Motor Speedway for a little one on one action. To watch the action, make sure you catch those episodes on March 17th and 18th, then again on March 24th and 25th on The Powerblock. Of course, if you want to be part of the action, then head over to the PowerBlock website, or visit the PowerBlock TV Facebook page where you can sign up to win the Ultimate Do-It-Yourself Package. PowerBlock is holding a sweepstakes in which the winner will receive a complete Factory Five Mk4 Kit, complete with Ford Racing parts and Matco Tools, as well as a bunch of other prizes. All you have to do is sign up online to win. No purchase necessary.[...]
