

Video: Nissan GT-R Alpha Omega by AMS runs the quarter mile in 8.63

20/03/2012 18:16 by admin

AMS's ridiculously amazing Nissan GT-R Alpha has just received an Omega upgrade and broken the quarter mile world record yet again. The last time AMS took a shot at pushing the limits of the quarter mile was about six months ago when they acquired a time of 8.97 seconds at 169 miles an hour. Now, with an impressive 1,602 all-wheel horsepower on tap, the insanely awesome, updated GT-R Alpha Omega has run the quarter mile in an astounding 8.6263 seconds with an exit speed of 173.8 mph on the first run of the day. This impressive result was achieved on March 17, 2012 at the Lonestar Motorsports Park. Even before the Nissan GT-R Alpha dominated the quarter mile, the car had already hit an impressive top speed of 216.9 mph in October 2011 at the Texas Mile. The car has also set a new record for 60-130 mph acceleration at a blistering 3.31 seconds - a time even more impressive than the most powerful supercars out there.[...]
