

Nissan GT-R Alpha Omega by AMS Performance

21/03/2012 23:24 by admin

We all know how impressive AMS's GT-R Alpha package is. It has broken a couple of world records in its time, including a quarter mile sprint time of 8.97 seconds at an astonishing 169 miles an hour and a top speed record of 216.9mph. It's definitely memorable, but absolutely conquerable. AMS Performance has decided to one-up themselves with their new Alpha Omega package for the GT-R. This package develops no less than 1,602 all-wheel horsepower with a maximum torque of 1,152 lb-ft out of the GT-R's 3.8-liter, twin-turbo engine. By comparison, the previous GT-R Alpha 12 was developed a total of 1,318 horsepower and 1,014 lb/ft of torque. The new Alpha Omega package hasn't even officially been announced, but it has already smashed the quarter mile world record: it managed an impressive 8.6263 seconds with an exit speed of 173.8mph. AMS promises that they won't stop there either! [...]
