HRE has recently released a photo shoot of a Ferrari 458 Italia wearing one of its most important goodies, the company's vintage wheels. The project was inspired by the Pininfarina P4/5, but of course, this is at an extremely smaller scale, as the rims are the only mod brought to this Prancing Horse.

The supercar has been gifted with a set of HRE 505 Vintage wheels, which uses a modular three-piece construction and are made of aerospace-grade 6061-T6 forged aluminum. The rims also use ARP hig... [...]
