

Ferrari FF on HRE Wheels [Photo Gallery]

29/03/2012 14:41 by admin

Ladies and Gentlemen (drivers), you might be looking at the first aftermarket rims placed on a Ferrari FF, with the Grand Tourer being fitted with a set of HRE Wheels.

The FF received HRE P45SC Conical rims, which are made from aerospace-grade 6061-T6 forged aluminum, using a one-piece construction. These rims come with a minimalist five-spoke design and use a 20-inch size. We have to tell you that we like the simple design of the rims, mainly thanks to the fact that this doesn't interfere wi...
