

Superchips Gives Volkswagen Polo GTI an Electronic Boost

10/04/2012 23:40 by admin

European owners of the Volkswagen Polo GTI looking for a relatively inexpensive solution to improve the performance of their cars will be interested to know that Superchips has released a new ECU tune for the German hatchback. The Polo GTI is powered by a direct injection 1.4-liter gasoline four-pot featuring both a supercharger, which boosts the engine until 3,000rpm, and a turbocharger that kicks in afterwards, for a maximum output of 180PS (177.53bhp) and peak torque of 250Nm (185 lb-ft).[...]
