

Chevrolet Camaro ZL1 by Redline Motorsports

25/04/2012 21:51 by admin

The 2012 Chevrolet Camaro ZL1 is considered the most powerful Camaro in the world, one that comes packed with a 6.2-liter supercharged V8 engine that produces 580 horsepower. On its own, the Camaro ZL1 is already a pretty impressive piece of muscle. But whereas some may be perfectly happy with its stock configuration, others still seek something more powerful. That's where Redline Motorsports comes into the picture. The Florida-based tuning company took a Camaro ZL1, added a high-capacity cold air intake, Redline Motorsports's proprietary camshaft, upper and lower pulleys, headers, improved heat exchanger, performance torque converter, and Mickey Thompson drag radials. All these modifications not only gives the Camaro ZL1 a hell of a lot more bite, but also an increased output of 750 horsepower and 700 lb/ft of torque. These numbers are good enough to allow the Camaro ZL1 a record quarter-mile time of just 10.34 seconds with a top speed of 134.79 mph.[...]
