

Ford Mustang BrenaSpeed 650R Roush Supercharger Package

27/04/2012 17:44 by admin

Back in 2010, Roush unveiled a pretty impressive upgrade package for the 2011 Mustang GT 5.0 that increased the total output from the standard 412 HP to a monstrous 550 HP with more than 470 lb.-ft. of torque. It was a pretty amazing update, but the Indiana-based BrenaSpeed tuner decided it could get even better. The best part is that this update can also be applied to the 2013 Mustang models. Roush's new performance package based on the Roush TVS supercharger system develops a total output of an even more impressive 650 HP and 585 lb-ft torque. In order to obtain this increase, the BrenaSpeed package includes a high-flow fuel rail with 47-lb fuel injectors, a twin 60mm throttle body, an air-to-water intercooler system, a low restriction air induction system, fuel system upgrade, colder spark plugs, and more.[...]
