

Lotus Esprit by Cam Shaft

02/05/2012 14:33 by admin

It's going to take a while before Lotus finally drops the new generation Esprit on the market, but until then, the previous generation Esprit is still getting tons of attention. The V8 version produced between 1996 and 2004 delivered a total of 354 HP and was capable of hitting a top speed of 175 mph. It was limited to only 1237 units, and one of those units caught the attention of Cam Shaft. The tuner started with tweaking the V8 engine, adding adjustable cases by Forge inside the turbo compressor pumps, a self designed compressor cooling system, and two 100-cell structure catalysts. As a result, the V8 engine now delivers a total of 492 HP and can hit an impressive top speed of 189 mph. The 0 to 60 mph sprint time has been improved, from the standard 4.9 seconds to 4.3 seconds.[...]
