

Video: Nissan Project 370z - Stage One

02/05/2012 14:33 by admin

Back in February, Nissan announced it needed the help of fans everywhere to design and build the coolest 370Z ever. Called the "Nissan Project 370z," this project was an extremely successful marketing ploy as it caught the attention of many. After almost two months, Nissan has announced that Stage One of the project is now complete. In this stage, fans were able to choose the powertrain, turbo kit, exhaust, suspension, and brake setup for the Nissan 370Z. Stage Two is next and it will be all about the car's design. The results of Stage One were not surprising; fans want more power! With that in mind, Nissan added a Greddy twin turbo kit that increased the total output to an impressive 500 HP. In order to support the extra power, the new 370Z was equipped with a Greedy Ti-C catback exhaust system. Next, the car was equipped with a KW suspension kit and a stop-tech big brake kit.[...]
