The Ferrari 458 Coupe is an awesome piece of design and engineering and the Spider version is 10% better due to the sensation of driving a stiff open-top supercar and being able to hear the engine properly. Novitec has endowed the 458 Spider with a body kit (previously used on the coupe) which includes a new front splitter, door-sil skirts, a new rear diffuser and either a rear spoiler lip or a full rear wing. The look is completed by the... [...]
