The 2012 Chevrolet Camaro Transformers Edition is already a special vehicle on its own. But for all of the muscle car's awesomeness, O.CT Tuning has a way to turn it into something even more worthy of its special edition badge. The Swiss tuner has just released a new performance package for the American muscle car, one that would make even Bumblebee proud. On its own, the Camaro Transformers Edition is already powered by a 6.2-liter V8 engine that produces an impressive 602 horsepower and 503 lb/ft of torque. Not content with that output, O.CT Tuning decided to add a supercharger and a new stainless steel exhaust system to the mix. The result? An increased output of 630 horsepower and 538 lb/ft of torque for the Transformers-badged Camaro.[...]
