

Superchips Develops a Firmware Upgrade for Nissan Qashqai 1.5 DCi

09/05/2012 19:17 by admin

The diesel-powered Nissan Qashqai 1.5 DCi is at Superchip's center of attention as the British tuning brand has created an ECU remap to boost the crossover model's performance. In factory trim, the Qashqai's Renault-sourced 1.5-liter turbocharged four-cylinder diesel develops a peak output of 108bhp (110PS) at 4,000 rpm and a maximum torque of 240Nm (177 lb-ft).[...]
