

Ford Mustang RTR by Vaughn Gittin Jr.

10/05/2012 02:19 by admin

Back in 2009, racer and drifter extraordinaire Vaughn Gittin Jr. unveiled the Mustang RTR-C, a custom Mustang that came with a carbon fiber body and 550 horsepower hiding under its hood. And now that the 2013 Ford Mustang has been unveiled, Gittin Jr. is back with the second-generation Mustang RTR. Details behind the project are still being kept tightly under wraps, but we do expect the muscle car to carry a similar design theme to the original carbon fiber-clad model. What's new for the 2013 Mustang RTR is that it will be made available on the Mustang V6 with an option to put a supercharger system to drive up the car's performance credentials a few levels past the standard model. The only thing that was released were a couple of rendered photos of the 2013 Mustang RTR, which, judging by its look, is a barnburner of a project.[...]
