

Alfa Romeo 8C Competizione by Wheelsandmore

16/05/2012 18:12 by admin

The past few days have been chalk full of tuning programs from German tuner Wheelsandmore, and now they are adding another one in the mix. The first package was called the Lamborghini Aventador "Rabbioso", which was then followed by the Ferrari 458 Perfetto. Now, the third package is based on an even more impressive sports car: the Alfa Romeo 8C Competizione. As usual, the package includes a cool exterior kit, as well as two stages of engine upgrades. The first stage takes the power up to 470 HP, from the standard 450 HP, with the use of an ECU upgrade. Total price for this upgrade is 1680 euro (\$2,138 at the current rates). The second stage goes even further to 485 HP. This stage includes an ECU upgrade and a handcrafted stainless steel exhaust system with remote-able valve flaps. The price for this upgrade is 6720 euro (\$8,552 at the current rates).[...]
