If you thought that the 20s used on that Mustang Shelby GT500 were too small, here's what you can put on a Camaro SS, some big ol' ludicrous 22-inch boys that will set of your ride with even more muscle than when it left the factory. These are brand new wheels for this size, debuting in May and a lowered piece of American muscle is just what Vossen needed to flex and strut about town. The fiv... [...]
