

Ferrari FF on Ace Alloy Convex Wheels

30/05/2012 11:55 by admin

The Ferrari FF is not just an extremely fast car, but also one design to cover great distances in even greater comfort, so gifting it with a set of custom wheels is no easy task. However, this didn't stop Ace Alloy from doing so, and we're here to see what they've done for the GT. The Prancing Horse was fitted with Ace Convex rims, which use a matte black finish that creates a strong contrast with the Rosso C... [...]
