Icon has recently received a fair amount of press due to its legal issues with Mattel, but they are also still hot on the path of building awesome custom cars. On deck for Icon is a car that is a little bit out of their norm, which is building bad-ass off-road machines. It is a modernized version of the Aston Martin DB4 GT Zagato Volante. The project appears to be still in its concept phase, so all of the details are a little scarce and we have reached out to Icon for additional information. For now, we do know that this model will boast a strikingly similar body as the 1960s Aston Martin legend, but in true Icon fashion there will be loads of customization. First on the list of customizations will be to hack off the DB4's annoying fixed head, and the signature Zagatto dual humps, but leaving the humps on the rear of the car, which you can see in the above image.[...]
