

Ferrari F430 by Fabulous

25/01/2009 14:15 by admin

The Fabulous modified Ferrari F430 appears like a real supercar with the installation of its fiber-reinforced plastic or carbon fiber aerodynamic kit which includes a front spoiler that comes with a front bumper, under spoiler and vent lining, new side skirts, a rear wing and a new stylish rear air diffuser as well as new exhaust cutters. A suspension pack enhances handling while the appearance is rounded out by a set of Detonator Mesh wheels including 19 inches at the front and 20 inches at the rear.
