

Fifty Five.Three-XLS Wheels Are Light [Photo Gallery]

20/06/2012 15:50 by admin

US wheel developer Fifty Five has recently given the world another one of its goodies, in the form of the Five.Three-XLS rims, which have one main aim: to keep the weight down. The rims are part of the xtra lightweight series (hence the name) and can be ordered in sizes ranging from 18- to 23-inches, while their width varies from 8.5- to 13-inch. The company says that you can choose almost any configuration using the aforementioned valuab... [...]
