

Bowler EXR Rally Car by Land Rover

25/06/2012 23:01 by admin

The agreement between Land Rover and Bowler is poised to become a collaboration made in rallying heaven and they're putting their collective feet out to show their first project together, the Bowler EXR Rally Car. The prototype rally car will sport a 'Powered by Land Rover' branding and has been co-designed by Land Rover and Bowler to be the kind of rally car that will put all others to shame. Or so they say. The EXR uses a modified chassis of the Range Rover Sport and has been fitted with a 5.0-liter V8 engine that you can also find in a number of Range Rover models. The only caveat is that the EXR's power train is FIA-restricted for racing purposes, which means that output is only limited to 300 horsepower and 428 lb/ft of torque. The EXR is also fitted with a six-speed manual transmission - and option of a Sadev 6-speed sequential transmission is also available - while also carrying Ricardo front, center, and rear differentials.[...]
