

Viper Receives Nutek Forged Wheels

26/06/2012 15:10 by admin

US aftermarket developer Nutek Wheels recently gave us its latest release, in the form of a set of rims for the second-generation Dodge Viper, with the company offering us a few photos that allows us to enjoy its fresh development. The Viper was gifted with Nutek Wheels's Series 705 Concave rims. This come with a brushed aluminum face that uses charcoal accents. As for their size, this sits at 20x10-inch for the front axle and 2... [...]
