

## Nissan GT-R Gets Strasse Forged Wheels [Photo Gallery]

26/06/2012 17:11 by admin

Not many tuners take on the challenge of creating new wheels for the Nissan GT-R, mainly due to the fact that the Japanese supercar's stock rims come with a special lip designed to keep the tire on the rim under the pressure developed by the extreme cornering forces generated by Godzilla. However, this didn't stop US aftermarket developer Strasse Forged Wheels from shoeing the GT-R. A pre-facelift example of the vehicl... [...]
