

Porsche 911 Gets Chevy LS7 V8 Engine [Video]

28/06/2012 12:58 by admin

Porsche has been spending the last 50 years trying to get the perfect balance for its rear-wheel drive 911, with the car becoming so good that it's extremely difficult to notice that the engine is placed at the back. Thus, when we heard that somebody in America decided to take a 911 and swapped its turbocharged flat six with a Chevrolet LS7 V8, we were more than curious to see the result. The adjacent ... [...]
