The 2012 F30 BMW 3-Series rides on a brand new platform that longer, wider and lighter. It's got electric sheering and made its debut in America while powered by a brand new, more efficient four-cylinder engine, the 328i. But there's one thing that stayed the same and that's the engine in the 335i, which has won many awards over the years. The latest tuning project to target the F30... [...]
