

Audi R8 V10 Gets APR ECU Tuning [Video]

16/07/2012 11:24 by admin

The Audi R8 has received a tuning gift from the US, with APR developing a Stage One ECU remap for the V10 model. APR explains that the 5.2-liter FSI (direct injection) V10 powerplant comes with a Bosch MED9 Engine Management System that has been detuned from the factory "to prevent the R8 V10 from stepping on the toes of other exotics in the VAG 5.2L FSI V10 lineup". The company (obviously) mentions the Gallardo, when ... [...]
