

## O.CT Boehler Concept BS3

03/02/2009 16:50 by admin

O.CT Tuning is getting ready to show off this predominantly white three-door hatch dubbed the Boehler concept.BS3. The car is based on an Audi S3 quattro and as it can be partially noted from the pictures, some changes have been implemented. Among these are a blaring sport exhaust system that features an improved air intake system, 8-piston brakes with 372mm discs and Yokohama Advan Sport tyres 245/30 R 20 and 255/30 R 20. They are supported by a fully adjustable O.CT coilover suspension.

The exterior features widened rear fenders, an aerodynamically-designed rear bumper, a rear air diffuser and stainless steel tailpipes. The engine bay, battery and air intake have been covered in carbon fiber for that extra sporting touch. Making the BS3 go forward is a 328hp (241kW) tweaked engine that also makes maximum torque of 425Nm. The BS3's makers say it will achieve the 0 - 100km/h time almost a whole second quicker than the standard Audi S3. The top speed is 265km/h. O.CT Tuning will only build 100 units of the BS3 at a price of about &euro;67,000 (US\$86,100) each.
